

PRAZI USA

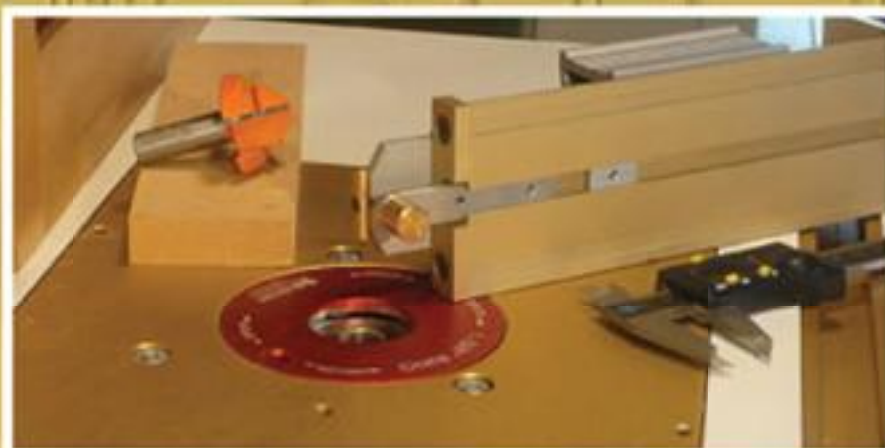

GROOVECENTER

ROUTER TABLE FENCE POSITIONING SYSTEM

Patent Pending

***Locate the exact center of your board.**

***Set up lock miter bits with ease! *No measuring or guess work!**

PRAZI USA Model #PR6000

*Allows quick and accurate setup of the router table fence. Allowing the cutting of groove or slots in the center of any board up to a 4.5" width or thickness.

*High Precision sliding gears accurate to .001". Creates a 2-1 reduction of the sliding pin in relation to the thickness of your stock. This allows the user to center stock on the exact center of the router bit.

*Make perfectly centered mortises in one pass

*Ideal for creating precision drawer slides in the center of your drawers & creating grooves for cabinet door panels

*The GrooveCenter allows for the quick and accurate set up of any manufacturers Lock Miter Bits.

*Made of high quality anodized aluminum

*Saves time and wasted stock
